

Bring the treadmill to brisk walking pace for 3 minutes (usually 3.0 - 3.5 Mph)
this is your warm up (ensure your incline level is flat)

As the timer reaches 3 minutes increase the speed to a light jog, concentrate on a balanced posture, hold the abdominals tight. (5 - 5.5 Mph)

Breathing in through your nose and out through your mouth as much as possible, Hold for 3 minutes...

Increase the pace as you reach the 6 minute mark by .5 - 1.0 Mph. (6 Mph)
Continue to breathe slow and controlled for a further 2 minutes. push here...

When the clock reaches 8 minutes bring the speed back down to 4 Mph for a 1 minute recovery session. Place your hands on your head and breathe in through the nose out through the mouth.

Increase the incline 30 seconds into the recovery by 3%

When the recovery ends step the pace back up to 5 - 5.5 Mph, hold here for 2 mins 30 seconds

Bring it back down for a 1 minute recovery session - 4 Mph

Then step it back up for a further 3 minutes at your maximum pace for the day (5 Mph min)

Take the speed back down for a minute recover (3.5 Mph) then go for the last 1min 30 secs at around 6.5 Mph.

Ensure you do a full recovery
